## **NOTICE TO THE MARKET**

### **ANEEL approves CELPA's 5<sup>th</sup> Periodic Tariff Review**

Equatorial Energia S.A. and Centrais Elétricas do Pará - CELPA inform the market that Agência Nacional de Energia Elétrica ("ANEEL"), at a public Board Meeting held today, approved the final result for CELPA's 5<sup>th</sup> Periodic Tariff Review valid as from August 07, 2019.

Already considering the financial components in the Company's tariff, the average effect to be perceived by the consumers was calculated at 0.69%.

The Net Regulatory Asset Base amounted to R\$ 5.047 billion, base-date August 2019.

Regarding the regulatory losses considered in the Company's tariff, ANEEL approved the 11.65% for technical losses over injected energy, and determined the non-technical losses over low voltage market trajectory starting at 33.5% for the first year of the cycle and ending at 32.0% for the last year of the cycle.

Additionally, ANEEL established the ex-ante components of CELPA's X Factor. For the Pd component (related to productivity), the percentage was determined at 1.13%. For the T component (related to the operating costs trajectory), the percentage was determined at -0.77%. To these figures, the Q component (related to quality indicators) should be added or subtracted, and it should be established every year on the tariff adjustments. For this tariff process, the Agency determined the Q component at -0.28%.
