**EQUATORIAL ENERGIA'S ANSWER:**

Dear Sir,

In response and compliance to the Letter 2758/2015 – SAE – BM&FBOVESPA, wherewith were ordered to this Company information regarding the existence of any fact that would justify the recent variations in the shares issued by Equatorial Energia S.A., as well as the number of trades and volume traded, also requesting an inquiry to the Company's Management on knowledge of any information that should be disclosed to the market, we hereby inform that, having held the inquiry, the Company could not identify any fact or information that would justify the high volume and number of trades held with shares issued by the Company.

However, through a market analysis, it is possible that the atypical movement seen with the Company's shares might be a consequence of:

- (a) Inclusion of the Company's shares in the composition of the MSCI Brazil Index since the closing of August 31, 2015 trading day. Such index is part of a series of indices MSCI whose objective is to measure the performance of shares in different countries and regions of the world and are used as reference by several institutional investors.
- (b) Inclusion of the Company's shares in the 2<sup>nd</sup> Preview of the theoretical portfolio of the Ibovespa Index, valid for the 4-month period from September to December 2015, whose estimate was made based on the trading day ended in 08/14/15.
