NOTICE TO THE MARKET

ANEEL Approves the Final Results for CELPA's 4th Periodic Tariff Review

Equatorial Energia S.A. and Centrais Elétricas do Pará S.A. (“Celpa”) inform the market and the general public that Agência Nacional de Energia Elétrica (“ANEEL”), at a public Board Meeting held today, approved the final results for Celpa’s 4th Periodic Tariff Review covering the period between August 07, 2015 and August 06, 2019. The approved figures are the economic basis for the annual tariff adjustments to happen between 2016 and 2018.

The average impact on consumers, considering the financial components relating to this tariff year, is 7.47%, being 10.22% to high voltage consumers and 6.30% to low voltage consumers.

We highlight the total Parcel B, without adjustments, amounting to R\$ 1,309,990 thousand, mainly being R\$ 588,345 thousand in Operating Costs, R\$ 405,185 thousand in Capital Remuneration and R\$ 178,066 thousand in Regulatory Depreciation, among others. After considering the productivity index and quality improvement between 2013 and 2014, Parcel B final figure amounts to R\$ 1,296,911 thousand.

In the same meeting, ANEEL set the technical losses over required energy at 10.15% and non-technical losses over low voltage market at 34.0% flat until the end of this cycle. Also, ANEEL set the ex-ante parameters for the X Factor at 1.50% (Pd component) and 0.21% (T component). The Q component, linked to the quality of service and which will be set every year during the annual tariff adjustments, must still be added or subtracted to these percentages.
